Location: Pakistan

Profile:

I am a second year Computer Science student at The Islamia University of Bahawalpur (CGPA 3.73) with a focused research interest in humanoid and medical robotics. My work sits at the intersection of machine learning, autonomous systems, and human-robot interaction—areas I have been building practical experience in through independent projects and a software development internship. I am applying to Erasmus Mundus Master's programmes in Advanced Robotics to deepen this expertise within Europe's leading research institutions, with a long-term goal of developing robotic systems that have real clinical impact.

Education:

BS Computer Science

2024 – Present

The Islamia University of Bahawalpur, Pakistan

CGPA: 3.73/4.0

Relevant coursework: Data Structures & Algorithms, Linear Algebra, Probability & Statistics, Object-Oriented Programming, Database Systems, Calculus, Discrete Mathematics.

Experience:

AI/ML Engineering Internship

Feb 06, 2026 – Mar 27, 2026

DevelopersHub Corporation, Pakistan (Remote)

Worked as an AI/ML Engineer Intern on real machine learning projects in a professional team setting. Applied supervised learning techniques, assisted with data preprocessing pipelines, and helped evaluate model performance across different tasks. Gained hands-on experience with Git, collaborative development workflows, and transiting practical requirements into working ML solutions.

Projects:

- **Auto-Tagging Support Tickets Using LLM:**
NLP, LLM, Python, Classification Techniques.
- **End-to-End ML Pipeline with Scikit learn Pipeline API:**
Feature Engineering, Pipeline Design, Hyperparameter Tuning.
- **News Topic Classifier Using Bert:**
NLP, Transformers, Text Classification, Fine Tuning, Model Evaluation.
- **Heart Disease Predictions:**
Machine Learning, Data Preprocessing, Statistical Analysis, Health Data Understanding, Model Evaluation.
- **General Health Query Chatbot:**
NLP, Basic Medical Knowledge Integration.

Technical Skills:

- **Programming:** Python, C++, Embedded C, SQL.
- **AI/ML:** Scikit-learn, PyTorch, Transformers, NLP.
- **Robotics:** Arduino, Mechatronics, ROS, Raspberry Pi.

- **Mathematics:** Linear Algebra, Probability & Statistics, Calculus, Discrete Mathematics.
- **Tools:** Git, Linux, Jupyter, VS Code.

Certifications:

- **Collaborative Robotics in Industry Specialization** — L&T, EduTech . Coursera
- **AI for Mechanical Engineers Specialization** — University of Michigan , Coursera
- **Hand-on Internet of Things Specialization** — University of Illinois Urbana-Champaign . Coursera
- **Reinforcement Learning Specialization** — University of Alberta . Coursera
- **Deep Learning Specialization** — DeepLearning.AI & Stanford University . Coursera
- **Machine Learning Specialization** — DeepLearning.AI & Stanford University . Coursera

Languages:

- **Urdu** — Native
- **English** — Fluent (academic and professional)
